What is KILLOX?
KILLOX is a food supplement containing turmeric, resveratrol, zinc and N-acetylcysteine. Turmeric possesses antioxidant properties, zinc contributes to cell protection from oxidative stress.

When is KILLOX recommended?
KILLOX is recommended:
- for the to counteract free radicals generated during inflammatory processes, both severe and chronic,
- in all cases where an antioxidant activity is necessary.

What does KILLOX contain?
Bulking agents: cellulose, calcium phosphates, turmeric and resveratrol Enterosoma-I® [association of: turmeric (Curcuma longa L., rhizome) d.e., N-acetylcysteine, grapefruit (Citrus paradisi Maclad, seeds) d.e., chitosan (crustacean derivative), resveratrol from polygonum roots (Polygonum cuspidatum Siebold & Zucc), black pepper (Piper nigrum L, fruit) d.e., emulsifier: polyoxyethylene sorbitan monoleate], zinc gluconate, stabilizer: reticulated sodium carboxymethylcellulose; anticaking agents: silicon dioxide, magnesium salts of fatty acids; coating agents: hydroxypropilmethylcellulose, ethyl cellulose, ammonium hydroxide, oleic acid, sodium alginate, fatty acids, cellulose, glycerol; medium chain triglycerides.

KILLOX acts thanks to the synergy of its active ingredients. Turmeric extract is titrated at 95% in curcuminoids, substances that have been proven to possess antioxidant properties.
Resveratrol extracted from Polygonum cuspidatum roots, thanks to its chemical structure hinder free radicals. It also possesses powerful antioxidant properties.
Zinc contributes to the normal functioning of the immune system and to cell protection from oxidative stress.
N-acetylcysteine is a glutathione precursor, powerful and important antioxidant substances produced by the body.

What does Enterosoma-I® mean?
It is patented technology that includes substances that improve the active ingredients' flow through the intestinal epithelium and therefore the absorption, promoting the effectiveness and limiting the enzymatic demolition.

How should I take KILLOX?
Take one to two tablets per day according to your needs. Swallow the tablet whole with water half an hour before meals.

How long should I take KILLOX?
Take two tablets per day for ten days during the acute phase. Subsequently, according to your physician's advice and to the amount of drugs taken, take two tablets per day for ten more days or one tablet per day for twenty days. For antioxidant protection it is possible to extend the consumption for longer periods taking only one tablet per day.

Are there any contraindication to KILLOX consumption?
Yes. The product must not be taken in case of crustacean allergy or any of the product's ingredients.

Can KILLOX be taken in cases of gluten or lactose intolerance?
Yes. The product undergoes specific analysis to ensure the absence of gluten or lactose. Each KILLOX batch also undergoes standard controls performed to guarantee its quality.

Can I take KILLOX during pregnancy or breastfeeding?
No contraindications have been reported but we recommend to ask your doctor before taking the product.

Can I take KILLOX with other drugs?
No interactions between KILLOX and other drugs have been reported. The product is generally well tolerated and did not show undesired side effects even after long term administration. Consult your doctor if side effects occur.

How should KILLOX be stored?
Keep out of the reach of children under three years of age. Store in a cool and dry place, protected from humidity, heat sources and direct sunlight. The expiration date refers to perfectly preserved and undamaged packages.
